

FUNDING AVAILABLE FOR Wetland Restoration

Restore and Protect Your Wetland

Do you have a wetland in need of some TLC? The Waiora Manuherehia Project is offering one-off funding to support wetland restoration efforts. Whether it's fencing, weed control, or replanting native species, we're here to help you enhance and protect these vital ecosystems.

Why Wetlands Matter

Wetlands are vital ecosystems that play a crucial role in catchment health, including flood and drought management, water quality improvement, and providing habitat for native species. Unfortunately, the number of wetlands has been steadily decreasing over time, so we're committed to supporting landowners and farmers in their wetland restoration efforts.

Expressions of interest are now open!

You can easily apply online www.mcg.org.nz/eoi/ or download the PDF version from our website www.mcg.org.nz/funding-available-for-wetland-restoration/ to submit via email to waiora@mcg.org.nz.

Make sure to send your EOI by 19 November, and if you have any questions, feel free to contact Annie Wallace at waiora@mcg.org.nz or call 021 113 0350.
